

BICYCLE DETECTOR SYMBOLS

The bicycle detector symbols are pavement markings used to indicate where cyclists should stop their bicycles to trigger a traffic signal.

LCG recently installed 6 of these pavement markings and corresponding signs along the Atakapa-Ishak Trail. They are at the following locations:

1 for each direction of traffic at:
E. Vermilion St. @ Johnston St.
Gen. Mouton Ave. @ E. Pinhook Rd.
Gen. Mouton Ave. @ E. University Ave.

There is a small bicycle detector placed near the pavement marking symbol; ***when cyclists stop with their tires on the front and back lines of the symbol, they will trigger a green traffic signal.***

The bicycle detector symbols were installed in conjunction with signs that instruct cyclists to wait on the pavement marking to facilitate a green light at the signal.

If you have questions about the bicycle detector signs and/or symbols, please contact:
